

What Is RADON?

- ◆ Radon is the **#1 cause of lung-cancer in non-smokers**
- ◆ Radon causes more than **21,000 deaths** each year - that's more than drunk driving deaths annually
- ◆ Radon is an **odorless, colorless, tasteless radioactive gas**
- ◆ Radon occurs naturally in the soil from decaying uranium and is found all across the United States, including thousands of homes along the Wasatch Front
- ◆ Elevated levels of radon can be found in **old or new homes**
- ◆ There is a **1 in 15 chance your home has elevated levels** of radon that should be mitigated.

The ONLY way to know if you have potentially deadly Radon Gas in your home is to TEST!
